

## TABLE OF CONTENTS

Synopsis.....	7
Introduction.....	9

### PART I

#### ISSUES AND CHALLENGES OF SUSTAINABLE DEVELOPMENT IN THE MEDITERRANEAN: A NECESSARY GLOBAL APPROACH

<b>Chapitre 1:</b> Sustainable development and the mediterranean area: utopia of a global approach? .....	15
I. Introduction .....	15
II. Sustainable development and the mediterranean area: from global to local .....	16
A. Equity, vulnerability and governance: strong stakes for setting a Mediterranean sustainability project? .....	16
B. Thinking about a unique model of Sustainable Development in the Mediterranean: an ambition with strong governance stakes .....	18
III. Sustainable development looking for a unifying mediterranean culture.....	20
A. From the global to the local, the necessity of territorializing the culture concept .....	20
B. The Mediterranean area: a sufficiently robust substrate of common culture? .....	22
IV. Conclusion .....	24
Annex: schedule with all the concepts .....	26
References .....	27
<b>Chapitre 2:</b> Access to the basic services, access to the land and human rights .....	31
I. Introduction .....	31
II. Right and development: Historical rapid background.....	31
III. Access to the basic services and access to the land.....	32
A. Access to the basic services .....	32
B. Access to the land.....	34
IV. The possible contribution of the Human rights .....	35
A. The basic texts.....	36
B. Instruments of the Human rights .....	37
C. Comments.....	38
V. Conclusion .....	39
References .....	39

<b>Chapitre 3: Security and sustainable development</b>	
in the mediterranean area .....	41
I. Introduction .....	41
II. How to secure the sustainable development in the Mediterranean?.....	42
A. Inventory .....	42
1. Introductory remarks .....	42
2. The situation of the Mediterranean.....	43
B. To ensure the security of Mediterranean people .....	45
1. Facilitating the link between the people in the Mediterranean.....	45
2. Secure the everyday life of Mediterranean people .....	45
3. A maritime space to secure and control .....	47
4. The global objective of security .....	48
III. The bases of the Mediterranean project.....	50
A. Sustainable security and professional future of Mediterranean youth .....	50
B. Assessment of the first months of the UfM.....	52
IV. Conclusion.....	54
<b>Chapitre 4 : The metropolitan areas in the mediterranean space.....</b>	<b>55</b>
I. Introduction .....	55
II. The process of metropolitan areas in the Mediterranean space..	56
III. To measure the process of metropolitan areas .....	58
A. Residential density .....	63
B. Variation of the population.....	64
IV. A selective process .....	65
V. Conclusion: The Mediterranean metropolitan-areas in front of the sustainable development .....	68
Appendix.....	69
References .....	73

## PART II VULNERABILITY AND ADAPTATION TO THE CLIMATE CHANGE

<b>Chapitre 5: Climate change and transformation</b>	
of the economic activities in the south of the mediterranean..	77
I. Introduction .....	77
II. Degradation of the natural resources .....	78
III. Question about agriculture .....	82
IV. What is the future of tourism? .....	89
V. Conclusion.....	95
References .....	97
<b>Chapitre 6: The mediterranean solar plan:</b>	
a project of the union for the mediterranean .....	99
I. Introduction .....	99
II. The Union for the Mediterranean.....	99
III. Difficulties of the Union for the Mediterranean.....	100

IV.	The Mediterranean solar plan.....	101
A.	The solar energy: A long not always success crowned history.....	104
B.	A little technique: various types of solar power stations.....	105
C.	The construction of an electrical communication .....	107
V.	Where is the situation of the Mediterranean solar plan project? .....	109
A.	The financings question .....	110
B.	The financing ways of renewable energies .....	111
VI.	Conclusion .....	114
	References .....	115
<b>Chapitre 7: The clean development mechanism of the kyoto protocol: a vector of sustainable development for the mediterranean basin?</b> .....		
I.	Introduction .....	117
II.	The definition of sustainable development in the climate law .....	121
A.	Convergence with the concept of sustainable development in public international law .....	121
B.	Specificity of the sustainable development principle within the framework of the climatic negotiations.....	123
III.	The institution of the cdm: which contribution to the concept of sustainable development?.....	124
A.	Sustainable development: first object of the CDM .....	124
B.	Sustainable development, condition of acceptance of the project by the developing country.....	125
C.	Reference of the sustainable development definition to the internal rights .....	126
IV.	Practice of the cdm: what operatinality of sustainable development in the mediterranean? .....	127
A.	Classicism of the partnerships and disparity of the references to sustainable development.....	128
B.	Fields of application of sustainable development: a question of opportunity .....	128
C.	Sustainable development absence of measurement.....	131
1.	Absence of any continuous assessment in spite of the criticism right of the stakeholders .....	131
2.	Indicators of sustainable development in CDM projects in the Mediterranean?.....	132
IV.	Conclusion: Sustainable development: malleable label and unexploited potential in the Mediterranean.....	132
	References .....	134
<b>Chapitre 8: The territorial management of the climate change in the mediterranean</b> .....		
I.	Introduction .....	135
II.	The Mediterranean: a relevant level to fight against the climate change.....	136
III.	Problems of the management of the climate change in the Mediterranean .....	137
A.	A multiplicity of implied actors .....	137

B.	Prospects of differentiated actions .....	138
C.	Strategies of action on several territorial levels .....	141
IV.	A strategic framework for the Mediterranean territorial collectivities .....	144
A.	To engage a step of dialogue .....	146
B.	To have a global and strategic vision of the great stakes .....	146
C.	Objectives progressive and shared for an immediate action ..	147
D.	An adapted internal organization and as high as the stakes ...	147
E.	Reliable data, evaluation and measuring instruments .....	148
F.	To build a collective vision of the objectives of sobriety, to build the engagement of all on the question of the climate change.....	148
	References .....	150

### PART III WATER ISSUE IN THE MEDITERRANEAN

<b>Chapitre 9:</b>	Israel – Palestine: water, source of conflict or cooperation?.....	153
I.	Introduction .....	153
II.	Water between Israeli and Palestinians, unbalanced relations and outdated agreements .....	155
A.	The issue characteristics .....	156
B.	Israeli-Palestinian relations are regulated by a set of agreements .....	158
III.	Potential of cooperation, some solutions.....	163
A.	Palestinian and Israeli stands: reference to geography or to chronology.....	167
B.	Some bases of a future agreement .....	170
	Annexes.....	175
	References .....	177
<b>Chapitre 10:</b>	The search for alternative resources to urban drinking water: the case of large sousse.....	181
I.	Introduction .....	181
II.	A flight of the drinking water consumption since 1970 .....	182
A.	Consumption growth .....	182
B.	Concentration of the consumers on the littoral and conflicts of use.....	183
1.	Large Sousse: an urban pole .....	183
2.	... where industry and tourism concentrate .....	184
C.	Progressive price setting: a tool for the service of the savings in water.....	186
III.	The alternative resources to the urban drinking water: user actors in the water management .....	188
A.	Alternatives of the households to reduce the invoice stress...189	
1.	Well and drillings: former recourses which threaten the ecosystem .....	189
2.	The "Mèjel": A modern return of impluviums for a sustainable solution.....	190

B.	The desalination of sea water: additional quantities of water with very long run .....	192
C.	The water recycling: an ecological solution which tramples ..	194
IV.	Conclusion .....	195
	References .....	197

**PART IV  
PROTECTION OF RESSOURCES  
AND NATURAL ENVIRONMENTS**

<b>Chapitre 11:</b>	The insular tourist taxation: an effective tool for sustainable development in the mediterranean? .....	201
I.	Introduction .....	201
II.	Many experiments .....	203
A.	Doubts as for the existence of a tourist taxation connected to the environmental concerns for Corsica.....	204
1.	The visitor tax .....	204
2.	The tax on the maritime and air passengers transport .....	204
B.	The experiment of the Balearic Islands: the rehabilitation of tourist spaces through the ecotax .....	205
C.	The experiment of the Sardinian tourist taxes: between environment safeguarding and search for new revenues from taxes.....	206
1.	The tax on the second home intended for a tourist use .....	208
2.	The tax on the capital gains drawn from the sale of tourist use second home .....	208
3.	The tax on the tourist stopover of the aircraft and yacht units .....	208
4.	The visitor tax .....	209
III.	Experiments marked by a failure.....	210
A.	A strong contestation from the taxpayers and tourist sector ..	210
1.	A contestation of a political nature .....	210
2.	A contestation from an economic nature .....	211
B.	Taxes called into question by the judges.....	212
1.	The position of the Spanish constitutional judge on the ecotax.....	212
2.	The position of the Italian constitutional judge as for the Sardinian impositions .....	213
3.	Community jurisprudence .....	214
IV.	Enriching experiments .....	215
A.	Critics being able to be relativized.....	216
1.	Debatable criticisms of economic order .....	216
2.	Easily avoidable criticisms of a political nature .....	217
3.	Criticisms of Legal order more difficult to circumvent.....	217
B.	Relevant and improvable tools .....	218
1.	An exportable tool: the tax on the air and maritime tourist stopover.....	218
2.	A traditional and easily improvable tool: the visitor tax .....	218
	References .....	221

<b>Chapitre 12: The Sustainable Development Co-Construction</b>	
<i>The Case of the Mediterranean Aquiculture</i> .....	223
I. Introduction .....	223
II. Institutional conditions of the sustainable development implementation.....	225
A. Littoral Governorship: The sustainable development tool and finality .....	225
B. The aquiculture joint development and the integrated management of the coastal areas.....	227
III. The Co-construction of sustainable development principles and criteria as a sustainable development appropriation modality .....	229
A. The choice of the method Principle, Criterion and Indicator (PCI, Prabbhu and al., 1996).....	230
B. Application to the two Mediterranean pilot countries.....	230
C. The generalization in progress within the framework of the Aquiculture Committee (CAQ/AqC) of the Mediterranean General Fishing Commission (CGPM/MGFC) .....	232
IV. Conclusion.....	233
Thanks.....	235
References.....	236
<b>Chapitre 13: Renewable energy sources for a sustainable tourism</b>	
into the mediterranean islands.....	239
I. Introduction .....	239
II. Causalities between renewable energy sources and tourism....	243
A. The importance of linkages and causality between RETs and tourism.....	243
B. The dominant causalities within the different geographic scales .....	244
III. Causalities and energy policy.....	244
A. National and local energy and tourism policies .....	244
B. Policies for the Mediterranean Basin and "territorial collectivism".....	245
C. "Territorial collectivism", causality between renewable energy projects and European Union .....	247
IV. Conclusions .....	248
Acknowledgments.....	250
Annex 1 .....	251
Annex 2 .....	258
References.....	262
<b>Table of contents</b> .....	267
